1. Applicant's Remarks with respect to claims 3-5, and 15-20 have been considered but are most in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

- 2. 35 U.S.C. 101 reads as follows:
 - Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
- 3. Claims 3-5, and 15-20, are rejected under 35 U.S.C. 101 because it is directed to non-statutory subject matter. It is to be noted that the digital data recorded on the recording medium is not structurally and functionally interrelated to the medium but is merely carried by the medium. Merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make it statutory. Data structures not claimed as embodied in computer-readable media are descriptive material per se and are not statutory because they are neither physical "things" nor statutory processes. See, e.g., Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory).
- 4. Claims 21-29 contain allowable subject matter over the prior art of record.
